

APC Techniques:

learning the basics

This course is intended to help you become comfortable with using American Paint Company products before starting any projects. We will be covering several techniques on how to achieve different distressed looks, and some faux finishes. This course is necessary in order to participate in any of the upcoming Project Nights. All you need to bring is yourself and, if you have one, a blow dryer! Everything else will be provided. The cost of this course is \$70, and it will take place at my shop 20 minutes northwest of Hanna. There is a limit of 12 participants per night, so register now! All of my DIY supplies will be 10% off for those taking the course!
