

Project Night 3:

decoupage and painting

Put those skills and techniques you learned at your previous APC paint courses to work, and come home with your very own creation. In project night three, you will get to expand on different painting techniques, as well decoupage on your choice of wooden cutouts. I have a wholesale account with www.wmidesigns.com (go to craft supplies, wood) and can order in for you at the same cost listed, no shipping, etc, or bring your own similar item. In order to take part in any of the project nights, it is a prerequisite to have taken one of my earlier APC basic courses, or have previous experience. The course will be \$40, plus the cost of your cut-out. If I am ordering your cutout from the above website, I need to know what you want at least 1 MONTH in advance. This course is limited to 8 people, so register now!
