

Project Night 4:

bring your own piece

Put those skills and techniques you learned at your previous APC paint courses to work, and come home with your very own creation. In the 'bring your own piece' project night, you will get to expand on different painting techniques, all while refinishing your own item. The APC introductory course is a prerequisite to any of the project nights.

With this night, it is suggested that you bring a piece small enough to finish the final coat of paint, distressing and finishing in a 3-4 hour period. If you are wanting multiple colors/coats of paint, you must have all but the final layer of color applied before the project night.

The cost of this course is \$20, but you must either bring your previously purchased paint/supplies, or purchase them that night. Please refrain from bringing products not purchased from Greystone Images: DIY as much as possible. If you are looking for hardware, check out www.vandykes.com. I have a wholesale account with them and will supply any of their products at my cost (works out to similar to the cost shown by the time you pay shipping and the USD-CAD exchange rate). I can also supply vinyl quotes at cost if you desire as well.
