

# Project Night 2:

## *mason jars and barnwood*

Put those skills and techniques you learned at your previous APC paint courses to work, and come home with your very own creation. The final result of your project here is really up to you, I will be supplying 3 mason jars and pine/barnwood for you to work with. In this course you will be working with both glass and wood, covering more painting techniques, as well as burlap flowers and some very basic wood working (I will do the cutting if you are not comfortable with saws)! The basic APC course is required before taking part in any Project Nights. This project night costs \$75, supplies included. This course is limited to 5 people, so register now!
